Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 190 ft.

JAN 2 1925

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Donnington Abingdon 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The reading on your 1925 rainfall return for August 26th does not compare well with neighbouring stations as shown by the table below Northcourt Abingdon ·28 inch Twickenham Hse -do- ·28 " Donnington -do- ·03 " Pumping Stn -do- ·28 " We should be glad of your comments on this difference J. 26.iv.26	My record is taken at 9 a.m. each morning & carefully entered at the time. The original entry for Aug 26th. is exactly as shown on the yearly return & was also shown on the card sent to you monthly. I regret I am unable to account for the difference you refer to between my reading & that of the three Stations you name. I often compare notes with Mr M.T.Tatham at Northcourt & we find there is often a difference in the quantity measured on a particular day. It is certainly a strange coincidence that the three Stations measured exactly the same amount on Aug 26th. The positions as compared with my gauge are;- Northcourt $\frac{1}{2}$ mile N.E. Twickenham Ho. $\frac{1}{2}$,, S.E. Pumping Sta. 1 ,, S.S.E. They are nearly in a direct line N. to S. & it is possible a thunderstorm occurred that did not reach my guage. W M Langford accept observer's entry on 26th August J. 1.v.26. April 29th 1926.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return..........................
3. ,, ,, ,, ,, Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

Form 1090 **METEOROLOGIC** [illegible] **ORGANIZATION.**
(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1921

Kept at Abingdon Sewage Pumping Station.
in the County of Berkshire.
by Raphael V. Hall. M. Inst. M. & Cy. E. Boro' Surveyor.

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Abingdon.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 6 in.
" " " " Sea Level 169. ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

[P.T.O.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Pumping Station Abingdon 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

The entries on your 1925 rainfall return for February 12th and April 18 are not in good agreement with neighbouring stations as shown by the table below.

	Twickenham House	Pumping Station	Donnington Abingdon
February 12	·33	–	·34
April 18	·29	·57	·25

If you have no reason to the contrary we would recommend that values of ·30 and ·27 inch respectively be adopted.
The total for July is not in agreement with the sum of the daily entries.
The correct total appears to be 3·44 inches
We should be glad of your comments on these points.

J
26.IV.26

REPLY.

I cannot vouch for the accuracy of the readings or the entries on the return sheets but my records show the figures given.

However on comparing your notes with my records I quite agree ~~that~~ ·30 and ·27 respectively should be substituted for the figures given and whatever figures were entered on your return the total of 3.44 is correct

A change is being made in the control of the Pumping Station which will I hope provide for more accurate readings and entries.

Walter H Lewis.
Borough Surveyor.
Abingdon.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........
2. Necessary corrections made in Monthly Return..........
3. " " " " Weekly (Form 3110)..........

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........

Kept at Twick…

in the County of Ber…

by G. …

…ong.

…ion.

…f Rain Gauge ……in.

…ge above Ground ……ft. ……in.

„ Sea Level ……ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

JAN 1922

Form A. 1. METEOROLOGIC [illegible] ORGANIZATION.

REGISTER OF RAINFALL IN 1921.

Kept at Twickenham House
in the County of Bucks
by G. [illegible] Esq

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Twickenham House Abingdon 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

It would appear from a comparison of your 1925 rainfall return with others from Abingdon that an omission has occurred on December 26th as shown by the table below.

Pumping Station Abingdon		·15
Twickenham House	-do-	-
Northcourt House	-do-	·12
Sonnington	-do-	·21

If you have no reason to the contrary we would recommend that a value of ·15 inch be adopted for this day making the total for the month 2.01 inches and for the year 25.45 inches

J.S. 26.iv.26

REPLY.

This was evidently an omission by my Man who takes the rain gauge, being Boxing day was possibly the reason of the Error, I personally was away during that period — I should think that ·15 would be quite right to insert.

George Saxby

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

AIR MINISTRY.

FORM 1091. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

JAN 1925

Kept at Heatherwood Hospital Ascot
in the County of Berkshire
by F. G. Miller.

Lat. 51° 24' 40" Long. 0° 41' 10"
Time of Observation 9 Hour
Nearest Railway Station Ascot.
Diameter of Funnel of Rain Gauge 5" in.
Height of top of Gauge above Ground 1 ft. 8 in.
" " " " Sea Level 320 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should be entered on Form 1090.

Notes and Instructions Overleaf.

Mr Browne

W d you prefer

in Ascot instead

of Wellington College in

Met Water Bd Table plus

when you have any [illegible]

How about Thames

Conservancy Table, is

W. College in either ?

J. 24.1.30

Yes Met-Mag Thames Con & Water Bd.

Dr Glasspoole

only objection is that Ascot reads in mm we therefore lose all the 0.1 mm in the conversion and have difficulty in reconciling MWR total which is a straight conversion with sum of converted daily reading

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION

REGISTER OF RAINFALL IN 1923.

Kept at BISHAM Vicarage
in the County of Berks
by Rev Wm Farrer

Lat. Long.
Time of Observation 9 a.m
Nearest Railway Station 1 Marlow
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 100 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

To the
Superintendent
British Rainfall Organization

Dear Sir,

In reply to yours of 12th inst: re an error in the figures given in my return, I have no doubt that your total is the correct one – & more than, probably, an error in addition! ~~[illegible]~~

extra trouble caused to you please accept my apologies, but at the time of sending in the report I was very occupied & hurried & did not, as is my custom, check the totals as carefully as usual!

Yours faithfully

E. Mabel Littlewood

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Hillside - Bracknell
in the County of Berkshire
by Mrs Littlewood

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Bracknell
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 207 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY. Ex. D.F.B. 771

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1922.

Kept at Bucklebury Place
in the County of Berkshire
by J. E. Henshall for Dr. C. Langer

Lat. 51°26' Long. 1°14' W
Time of Observation 9h
Nearest Railway Station ?
Diameter of Funnel of Rain Gauge .... in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 408 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

JAN 1924

Form 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Riverina, Elm Road, Earley, Reading
in the County of Berks.
by W. George Lingham F.R.a.S.

Lat. 51° 25′ 46″ N Long. 0° 56′ 25·5″ W. by Ordnance Map.
Time of Observation 9.0. am.
Nearest Railway Station Earley. S.Ry.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 265. ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090

AIR MINISTRY.
METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
REGISTER OF RAINFALL IN 1924.

Kept at Englefield House
in the County of Berks.
by J. H. Benyon

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Theale
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 not read every day

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at FARINGDON. (The Nurseries)
in the County of Berks.
by R. Tucker & Sons

Lat. 51° 39' 30" N. Long. 1° 34' 30" W.
Time of Observation 9-0 A.M.
Nearest Railway Station FARINGDON.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 400. ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Ridgeways Finchampstead 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
An examination of your return for 1925 suggests that an omission has occurred on July 30th as shown by the table below	
Heatherwood Hospital ·24 inch Wellington College ·30 " Ridgeways – ·28 Wokingham ·25 "	I find, on referring to the book, that there were ·28 on July 30th
If you have no reason to the contrary we would recommend that ·25 be adopted making the total for July 3·28 inches	
The totals for August and October are not in agreement with the sums of the daily values. The correct sums appear to be 3·21 and 2·45 inches respectively.	On adding the amounts for August & October again, I have made them 3·21 & 2·43
As the readings from October 18th to the end of the year have not been thrown back, we should be glad to have the measurement read at 9am 1 January 1926 so that we can obtain a total for the year.	nil ~~most 48~~
G.B. 21.iv.26	M. E. Horsfall

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..................
2. Necessary corrections made in Monthly Return..................
3. " " " " Weekly (Form 3110)..................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..................

FORM 1090 **METEOROLOGICAL OFFICE. BRITISH RAINFALL ORGANIZATION.**
(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1921

Kept at The Garden's, Frilsham House
in the County of Berkshire
by W. E. Austen

Lat. Long.
Time of Observation 9 a.m
Nearest Railway Station Hampstead Norris 3½ miles
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 11 in.
" " " " Sea Level 370 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Frilsham House Gardens

in the County of Berkshire

by Wm E. Austen

Lat. Long.

Time of Observation 9. a.m.

Nearest Railway Station Hampstead Norris

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 370 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Greenham Common

in the County of Berkshire

by J. H. Bowman

Lat. ______ Long. ______

Time of Observation ______

Nearest Railway Station ______

Diameter of Funnel of Rain Gauge ______ in.

Height of top of Gauge above Ground ______ ft. ______ in.

" " " " Sea Level ______ ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following. ______

Records taken in Millimetres should be entered on Form 1091.

Height of top of Gauge above Ground 1 ft. 2 in.

" " " " Sea Level 275 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Hambleden Lock

in the County of Berkshire

by Mr S. T. Bourner

Lat.

Long.

Time of Observation 9.0 AM.

Nearest Railway Station Henley on Thames

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 2 ft. — in.

" " " " Sea Level 120 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following. ·16"

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Red Hill Cottage Newbury 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

The entries on your 1925 rainfall return for April 5th and October 20th are not in good agreement with those of neighbouring stations as shown by the table below.

	Greenham Common	Red Hill Cottage	Wash Hill
April 5	·75	–	·80
Oct 20	·63	·09	·60

If you have no reason to the contrary we would recommend that values of ·75 and ·59 inch be adopted, making the totals for April 2·61 & October 3·60

The total for July is not in agreement with the sum of the daily values. The correct total is 3·19 inches. After these amendments have been made the total for the year will be 32·97 inches.

We should be glad to have your comments on these points

J.P. 27.IV.26

REPLY.

In my pocket register the rainfall on April 5th is ·05. I am sorry there was this mistake.

The rainfall for Oct 20th is correct. By way of explanation I can only say that often when districts round us have heavy rain & storms we don't have them. They follow the course of the Hampshire downs or the river on the other side of our valley & leave us dry. I believe the record I sent you is correct.

I have corrected my totals for July & am obliged to you for pointing it out.

F. M. Lewis

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted Accept observers total for the year.
2. Necessary corrections made in Monthly Return J.P.
3. " " " Weekly (Form 3110) 1.V.26.

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

AIR MINISTRY. Daily

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1925.

COPY by B.R.O.

Kept at Lower Basildon, Estate Office

in the County of Berkshire

by A. T. Cox.

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

(Signed) W. Farren [P.T.O.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Hurley House 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your 1925 rainfall return with those from neighbouring stations suggests that an omission has occurred on October 15 as shown by the table below	I find, on reference to the record of October that between Oct 11 & 20 the figures are

Temple House	·11 inch
Hurley House	—
Hambleden Lock	·13

Oct 11	—	
" 12	·03	
" 13	—	Frost
" 14	—	Frost
" 15	·11	
16	·11	
17	—	
18	—	
19	·95	
20	·22	

If you have no reason to the contrary we ~~would~~ recommend that a value of ·10 be adopted making the total for the month 3·19 inches and for the year 28·95 inches.

J.
27.IV.26

This makes the total for
Oct 3.20. & for
the year 28.96.

I am sorry to have made
an error W. Farrer

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted......................
2. Necessary corrections made in Monthly Return..........................
3. " " " Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Temple Gardens

in the County of Berks.

by Mrs Owen Williams (Gardener George Groves)

Lat. 50° Long. 34 Ms

Time of Observation 9. 0 am

Nearest Railway Station Great Marlow (2½ miles)

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft in

" " " " Sea Level 106 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Temple House Gardens 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The entries on your 1925 rainfall return for January 4th April 20th and 21 and December 26th are not in good agreement with surrounding stations as shown in the table below	Herewith Corrected George Groves 30th April 1926

	Hurley House	Temple House	Hambledon Lock.
Jan 4	-	~~3~~·03	-
April 20	-	~~·30~~ no rain	-
" 21	-	~~[illegible]~~ do	-
Dec 26	·15	no rain	·18

If you have no reason to the contrary we would recommend that the entries for the first three days be deleted and a value of ·15 inch be adopted for Decr 26 The totals for the months will then be January 1·89 April 1·89 and December 2.23 inches and for the year 31·41 inches The totals for January and December were not in agreement with the sum of the daily values but the sums have been adopted J.S.
27.10.26

Adopt observers corrections ~~[illegible]~~ but — ? on Dec 26th
3.5.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return............................
3. " " " " Weekly (Form 3110)........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

Stn No 789

REGISTER OF RAINFALL IN 1922.

Kept at Newbury Grammar School,
in the County of Berks
by

Lat. 51° 2' 30" Long. 1° 20'
Time of Observation 9.15 am
Nearest Railway Station G.W.R.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ft. 9 in.
" " " " Sea Level 279 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Forbury Gardens, Reading
in the County of Berks
by John Bowen, Borough Surveyor

Lat. 50° 27' 23" Long. 0° 57' 52
Time of Observation 9 am
Nearest Railway Station S. E. & C. Railway
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 5 in.
" " " " Sea Level 145. 16 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at 93 Waverley Road Reading 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

An examination of your 1925 rainfall returns shows that the January entries are not in good agreement with those of other Reading stations as shown in the table below

	Reading Waterworks	Waverley Road		Forbury Gardens

REPLY.

In reply to your enquiry of Rainfall registered by me at above address, I find in looking back at my record book that the wrong column had been copied down, so I have put down the original observations has they should have been.

Yours truly
W. E. Austen

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at The Lrnnes Westwood Road
in the County of Tylehurst Reading
by Thomas Dathans

Lat. Long.
Time of Observation 9 a m
Nearest Railway Station Tylehurst
Diameter of Funnel of Rain Gauge 4 in in.
Height of top of Gauge above Ground 2 ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

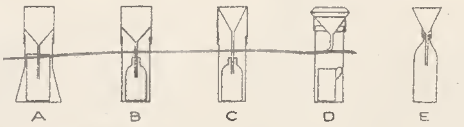
Indicate pattern of gauge in use by deleting those sketches of cross sections of gauges which do not represent it. If the pattern is different from any of these please make a sketch of it. (Good gauges to use are those marked A and B.)



***If you know of any record of rainfall** not quoted in **British Rainfall,** please give the observer's name and address :—*

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied :—

(a) Is it known that the gauge was empty at the beginning of the measured rainfall?
(b) What note was made of the times of beginning and end of this fall?
(c) When was the measurement made?

Sept 19 1·05

a Yes

b Steady all day & night

c 9 Am 20th for 24 hours.

M.O. 7
2 JAN 1926

D INSTRUCTIONS.

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C.2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type* :—

(a) *Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.*

(b) *The raingauge should be visited every morning without exception.* When there has been no precipitation the entry in the register should be a dash — (not ·00). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than ·005 in. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

(B) The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

(c) *On some measures there is graduation marked ·005; this graduation is to show the limit between the amounts which count as ·01 and those which are mere "traces."* An entry ·005 is not to be made in the register.

(d) If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus 17/18 } ·14 would show that the reading on the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was ·14 in.

(e) *The total rainfall for the month is found by addition. The addition should always be done a second time as a check.* The check is of special importance when the total has already been found in another copy of the register.

(f) *The "total number of days with ·01 in. or more" includes all the days with any rain except those for which the entry is "trace."*

(g) If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

(h) The heaviest daily fall for each month should be underlined.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Woodlea Wallingford 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your 1925 rainfall return suggests that omissions have occurred on December 27 and 28 as shown by the table below	I am very much obliged for your memo and am. I find I registered ·29 on the 28th and then crossed it out and put it down on the 29th. I don't know how this was done. If St Leonard's Rectory have a fall of ·29 or thereabouts on the 29 I presume I must have crossed it out in error and failed to enter the rainfall on the 29th.

	Dec 27 & 28	
St Leonards Rectory Wallingford	·24	inch
Woodlea -do-	–	"
Upton	·27	"
Ipsden	·15	"

If you have no reason to the contrary we would recommend that a value of ·25 be adopted for these two days making a total for the month 2·05 ins and for the year 28·56 inches

J.
26.1.26

·29 adopted for 28th

G. Blade
Wallingford
28.1.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........................
2. Necessary corrections made in Monthly Return..........................
3. " " " " Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........................

AIR MINISTRY.

Form 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

783 A

REGISTER OF RAINFALL IN 1923.

793

Kept at Wallingtons (Kintbury parish) Hungerford
in the County of Berkshire
by A. S. Gladstone

Lat. ______ Long. ______
Time of Observation Various
Nearest Railway Station Kintbury
Diameter of Funnel of Rain Gauge five in.
Height of top of Gauge above Ground 1 ft. - in.
" " " " Sea Level ab 360 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

MAP

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Copy B.R.O.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Wellington College

in the County of Berkshire

by E. O. Tancock

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

Kept at Bicton, Windsor
in the County of Berkshire
by Mabel G. Cookson

Lat. 52° Long. 5
Time of Observation 8.30 a.m
Nearest Railway Station Windsor G.W.R
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 88 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

2. In filling up Form 1090 the following rules should be observed:

(a) Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.

(b) The raingauge should be visited every morning without exception. When there has been no precipitation the entry in the register should be a dash — (not ·00). The entry "trace" or "tr" is to be made in the two following cases, ... the gauge and the observer knows that this is not the result of a ... previous time of

Reply to Query on Obsns.

Bicton, Windsor. April 28th 1926

Yes, it is correct, I have it down in last year's diary; it was thunder rain, & very local,

Mabel G. Cookson

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Bicton, Windsor 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

The entries on your 1925 rainfall return for September 23 & 24th appear to be repetitions of September 21st & 22

A comparison is given below.

	Royal Gdns Windsor	Bicton Windsor	Eton.
Sept 21	·11	·45	·25
22	·49	·30	·49
23	·01	·45	·01
24	·04	·30	·02

We should be glad to have your comments on this point.

Form 1090 **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1922.

Kept at The Royal Gardens Windsor

in the County of Berks

by A MacKellar

Lat. 51-28 N. Long. 35 W

Time of Observation 9 a m

Nearest Railway Station Windsor G W

Diameter of Funnel of Rain Gauge 6 in.

Height of top of Gauge above Ground 1 ft. 2 in.

" " " " Sea Level 88 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in *"Rules for Rainfall Observers,"* sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

QUERY FORM.

On examination of the return of observations made at Appin Lodge, Wokingham 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
An examination of your 1925 rainfall return shows that the total for July is not in agreement with the sum of the daily values. This would appear to be due to the entry of ·32 on the 26th which seems to have originally been ·02 inch. The correct total is 3·49 inches. It also suggests that an omission of about ·10 has occurred on December 7th as shown by the following table Wokingham Town Hall ·10 -do- Appin Lodge – Bracknell ·10 If you have no reason to the contrary we would recommend that ·10 be adopted. As the entries from December 19th to the end of the year have not been thrown back we shall require the measurement read on 1st January 1926 to obtain the total for the year. We should be glad if you would enter this on the opposite side of this form.	I was with an invalid relative on the Continent Nov. 24 1925 – Feb. 16/26. The record was kept by Gardener. Total given by Gardener for Jan. 1. 1926. ·03. The rainfall was kept by Mrs Blakeney. As I am afraid I don't do it accurately. Perhaps you would like to cut me out. As I do it, chiefly because she used to. And as there are records from Wokingham + Bracknell, mine seems unnecessary. The above is addressed to Mrs Blakeney. I am sorry to say, she passed away Jan. 11, 1924. W. R. Blakeney (Rev) May 1, 1926. Noted A. S. 4/5/26

J.S. 27.IV.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Wokingham

in the County of Berkshire

by C. W. Marks

Lat. 51·24 Long. W 0·51

Time of Observation 9 a.m.

Nearest Railway Station Wokingham

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. — in.

" " " " Sea Level 174·3 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following. ✕

Records taken in Millimetres should not be entered on this form.

FORM 1090 METEOROLOGICAL OFFICE. ~~BRITISH~~ RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924

Kept at Kennet Orley Woolhampton

in the County of Berkshire

by S Catina for Mrs Whidborne

Lat. Long.

Time of Observation 9 a.m

Nearest Railway Station Midgham G.W.R.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground ft. 10 in.

" " " " Sea Level ft.

5 JAN 192

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.
·10

Records taken in Millimetres should be entered on Form 1091.
